Addressing systemic discrimination

We are hosting free development sessions to support GP practices and PCNs to reduce inequalities across the cancer pathway, with a focus on how poverty & racism impact outcomes.

The sessions delivered by the Health Innovation Network South London and brap will help primary care professionals address healthcare inequalities, which can improve early diagnosis and care and address healthcare inequalities across all patient groups.

Sessions aim to help participants:

Explore how poverty & racism impact outcomes, in particular for cancer

Interrogate the factors that contribute to these outcomes (with a focus on poverty & racism)

Reflect on what you can do in your role to take responsibility for addressing differential outcomes and experiences.

Half-day Sessions – book here:
